Exhibitor Profiles

(In Alphabetical Order)

Advanced Biotechnology Centre

Advanced Biotechnology Centre (ABC), experts in the area of Food, Water and Air analysis was established in 2003 in Dubai. We are an approved & accredited lab under the Dubai Municipality and is also the first and the only private DNA based testing lab in the GCC which is accredited to ISO-17025 standards by Dubai Accreditation Centre (DAC). The Lab has been providing various testing services in sectors like Food and Environment(Water/Air), Molecular Services etc for clients who engage our expertise for various analysis done using common conventional methodologies to the high end DNA based technologies.

We specialize in DNA based testing and monitoring in Food, water quality assessment/analysis and Indoor Air Quality Monitoring. Specific pathogens in food and water like salmonella, pseudomonas, legionella etc can be tested by utilizing our DNA based method which is much more faster and reliable. Pathogens which are unidentifiable using conventional methodologies can be identified with the help of our Microbial identification services done by Ribosomal DNA sequencing method. Our other areas of expertise include training and other services in Forensic Science-Genetic finger printing, DNA barcoding, Phylogenetic analysis, Species Identification, Microbial Identification, Biodiversity studies, Cycle sequencing, Lab Set up with Consultancy, Legionella Risk assessment , Quality assessment studies, Impact assessment studies etc. We are equipped with most modern tools in DNA technology like PCR, Real time PCR, Genetic sequencers/ Analysers etc. Our expertise can also provide and conduct trainings and studies related to Air quality, Water quality risk assessments etc. To know more in detail on all services provided by ABC, Further If you have any enquiries or require more clarifications on our services, please be in touch with us via the contact details provided below.

Dubai Municipality

Dubai Municipality was founded in 1954, commencing its activities with a cadre of seven employees undertaking simple tasks in cleaning the city. The first decree establishing the Municipality was on February 28, 1957, whereby 23 municipal council members had been appointed from the elders of the country and traders with limited powers, the most important of which was to take care of health and architectural affairs of the city, as well as to organize construction and beautification of the city and provide constructive suggestions to the government.

In the 1974, His Highness Sheikh Rashid bin Saeed Al Maktoum, God rest his soul, issued a decree, which nullified the former order to establish the Municipality, and stated to establish the new Dubai Municipality, having independent characteristics, morals and powers within the entire emirate.

In 1980, a decree had been issued establishing the Municipal Council, appointing 32 members headed by His Highness Sheikh Hamdan bin Rashid Al Maktoum, Chairman of Dubai Municipality.

The Municipality continued its development, coinciding with the growth of the Emirates of Dubai, and reached to 13,000 employees working in 32 departments under six sectors, namely:

- Corporate support services sector
- International affairs and partnerships sector
- Engineering and planning Sector
- Environment and public health services sector
- General support sector
- Environment and public health control sector.

Hence, Dubai Municipality is regarded as one of the largest governmental institutions in terms of services rendered and projects executed, and a leading driver of growth and evolution of the Emirate of Dubai.

Global Food Safety Initiative (GFSI)

The Global Food Safety Initiative (GFSI) is an industry-driven initiative providing thought leadership and guidance on food safety management system controls necessary to assure the safety of the food supply chain. This work is advanced through collaboration between the world's leading food safety experts from retail, manufacturing and food service companies, as well as international organisations, governments, academia and service providers to the global food industry. They meet together at Technical Working Group and Stakeholder meetings, conferences and regional events to share knowledge and promote a harmonized approach to managing food safety across the industry. GFSI is managed by the Consumer Goods Forum (CGF), a global, parity-based industry network, driven by its members.

Ministry of Environment and Water in UAE

The Ministry of Environment and Water was established in February 2006, replacing the Ministry of Agriculture and Fisheries, taking charge and responsibility of all powers and functions that the latter was entitled for. The Federal Environment Agency and the General Secretariat of Municipalities had their functions and authorities transferred, to be accommodated within the Ministry's mandate. The creation of the Ministry of Environment and Water came in the context of a national vision to strengthen the commitment of the United Arab Emirates to the environment and to sustainable development, as a response to many developments that have occurred on the national and global levels in the previous years.

NASCO International Sales

Nasco was started in 1941 by a vocational agricultural teacher, Norman Eckley. He developed several teaching aids to use in his vocational agriculture classes...teaching aids that were not readily available from any other source. This simple act of filling a classroom need with an appropriate product was to become a way of life for Nasco in years to come.

Nasco has over 21 different catalogs offering over 80,000 unique products to meet the needs of teachers in 14 different educational subject areas, farmers and ranchers, and industry. In addition to serving customers in all 50 states, Nasco's unique blend of products for education, health care, agriculture, and industry appeals to customers in over 180 countries. Our mission is to provide customers with the best in quality, personal service, and affordably priced products. Nasco's mail-order catalogs offer a convenient, inexpensive way for individuals in education, health care, agriculture, and industry to shop for the items they need.

Sharjah Municipality

Founded in 1927, Sharjah city municipality (SM) is one of the oldest municipalities in the UAE. However, the modern system of the municipality as a multiple-service providing body was initiated in 1971 when a decree was issued to define its activities and grant it with powers to carry out the necessary supervision over all public utilities and public services provided to citizens. The municipality is a civic body through which services and utilities of the emirate's modern society are intervened. Therefore, the role and activities of the municipality cannot be fully detailed in this short expose. SM executes many public projects in the emirate of Sharjah every year, and it has a great role in boosting the economy, society, public health, and many other fields in the emirate. Since its , SM has gone through multiple stages and witnessed rapid growth of its occupational and organisational structures, headquarters, balance sheets and responsibilities.
